

REALISTA

The operating system for modern real estate agencies

One connected workspace for listings,
teams, clients, documents and growth.

BUSINESS SUMMARY

**A clearer path from lead
to completed transaction**

EXECUTIVE VALUE PROPOSITION

One platform. Every agency advantage.

Realista helps agencies replace disconnected tools with a single operating layer that makes every listing, client interaction and team action easier to manage.

CONTROL

One source of truth

Properties, clients, documents, messages and activity in context.

PRODUCTIVITY

Less admin per deal

Automated workflows, reusable data and fewer manual handoffs.

GROWTH

A stronger agency brand

Better discovery, trusted profiles, reviews and team visibility.

THE AGENCY PROBLEM

The cost of fragmented operations

Agency teams lose time when information lives across spreadsheets, inboxes, messaging apps, listing tools and local folders.

01

Leads go cold

Follow-ups are missed when client context is scattered.

02

Listings drift

Details, images and status updates are hard to keep aligned.

03

Compliance is manual

Documents are difficult to classify, find and share.

04

Teams lack visibility

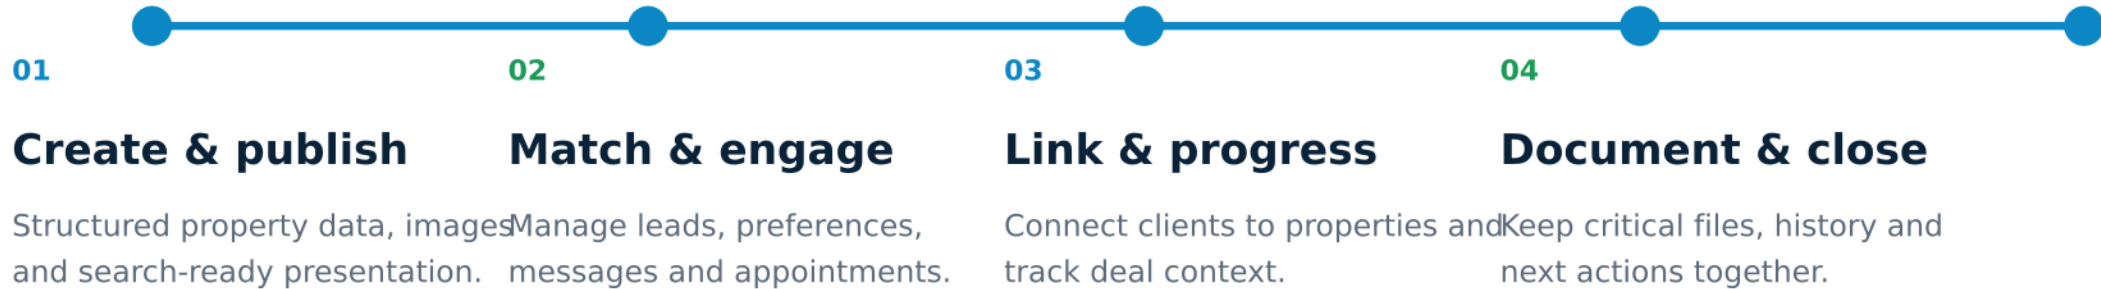

Managers cannot see the full operating picture.

Realista turns these disconnected tasks into one repeatable agency workflow.

From listing to closing — without losing context

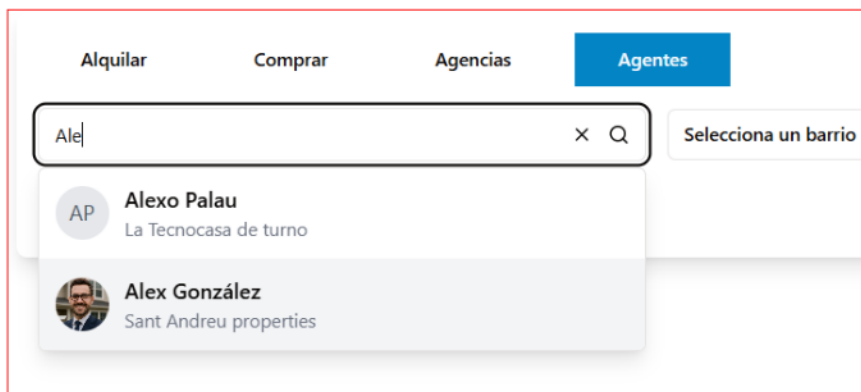

A single connected journey helps agents move faster and gives leaders a reliable view of what is happening across the business.

The value compounds: every action creates reusable data for the next one.

Give every listing a complete operating record

Realista makes the property more than a listing: it becomes a structured workspace for the agent, the agency and every stakeholder involved.

Property-level value

- Consistent property data and media
- Operational status and workflow context
- Documents, incidents, communications and history
- A foundation for better search and matching

Make every client interaction actionable

Agents can understand the client, connect the right properties, capture the history and keep the next action visible — without switching systems.

CLIENT 360°

Context that travels

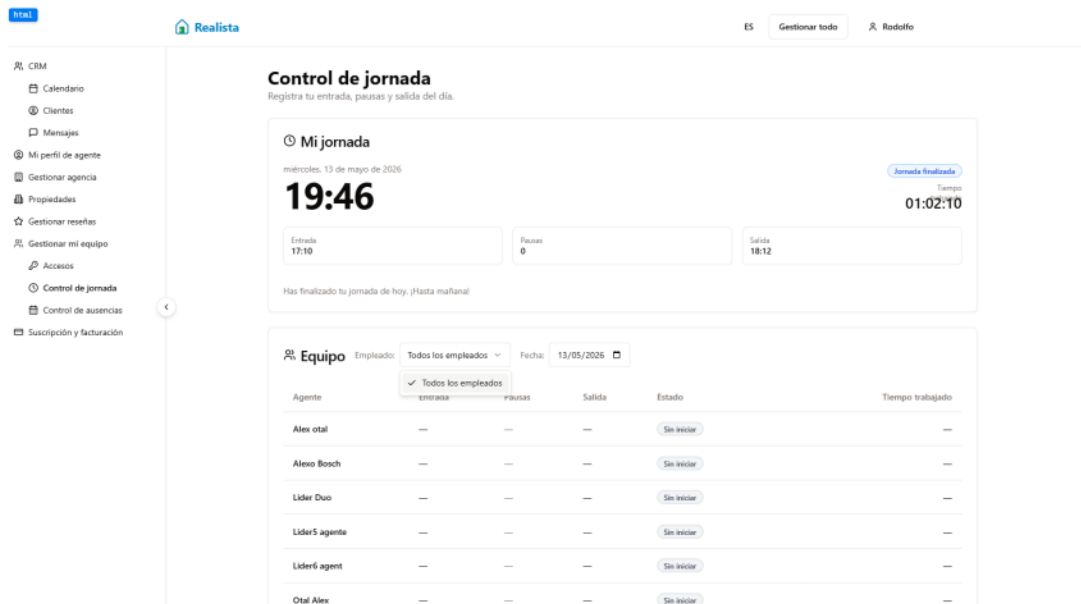

Preferences · status · contact history
appointments · linked properties
messages · documents

AGENCY OUTCOME

More relevant conversations.
Faster follow-up.
Higher confidence at every step.

Turn individual work into agency capability

Realista gives agencies the operating tools to coordinate people, standardize work and manage performance as the business grows.

Built for agency leadership

- Team and access management
- Working-time and absence controls
- Centralized billing and seat-based plans
- Network and franchise-ready structure

Help agencies get discovered — and chosen

Realista connects search, agency presence, agent profiles and reviews so the public can move from discovery to trust with fewer unanswered questions.

A stronger public profile supports brand differentiation, local visibility and conversion.

SCREENSHOTS FROM THE PRODUCT

A product experience built for clarity

Simple search, clear actions and decision-support tools make the experience easier for agents, managers and clients alike.

Find Your Dream Home

Discover the perfect property with Realista

Discovery

Public-facing search experience that makes the marketplace approachable.

BUSINESS CASE

Why agencies adopt Realista

Realista is not another isolated tool. It is the operating layer that helps an agency protect time, improve service quality and create a scalable way of working.

01

Protect time

Reduce repetitive admin and context switching.

02

Improve service

Make every client touchpoint more informed and consistent.

03

See more clearly

Give leaders visibility across people, listings and pipeline.

04

Scale confidently

Support teams, agencies and network growth from one base.

Realista: less operational friction, more focus on the deal.
